

NETFLIX DATA ANALYSIS

by Kapil Saini, Lennard Fock, Mohammad Sajed,
Nhaan Luu & Vikram Dhondappa Kamble

Midterm Presentation

KEY INSIGHTS

Subscription Type

Most users are subscribed to the Basic plan.

Revenue

Device

Seasonality

The highest revenue is generated from users located in the United States, followed by Canada and the United Kingdom.

The majority of users access Netflix using either a Smartphone or a Laptop.

A significant portion of the revenue comes during the months of July to October, indicating possible seasonal or marketing trends.

INTRODUCTION

Dataset Overview

The Sample Netflix userbase consists of 10 columns and 1500 rows.

The data was collected over 3 years with in the time span of 2021 until 2023.

The data set consists of the following Columns:

User_ID, Subscription_Type, Monthly_Revenue, Join_da

te_new, Last_Payment_Date_modify, Country, Age, Gen

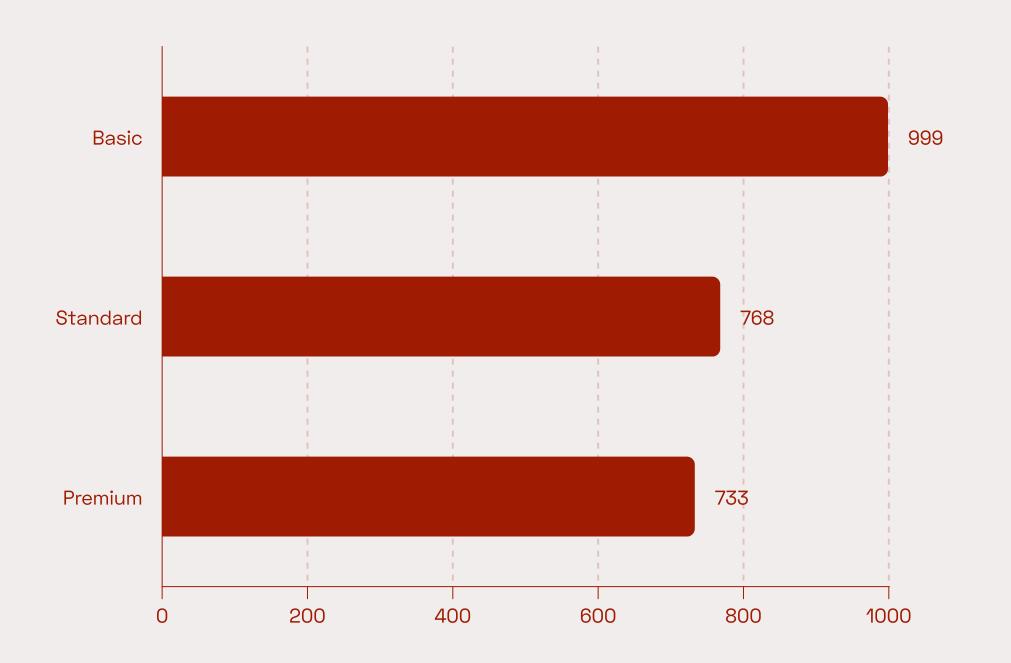

der, Device, Plan_Duration

OKRs are often set and re-evaluated quarterly. The purpose of using this methodology is creating alignment in the organization and ensuring that everyone is working towards the same goal.

SUBSCRIPTION TYPE

As per the survey data collected 2021-2023:

- The **Basic plan** has the highest number of users at 999, followed by the **Standard plan** with 768 users.
- The Premium plan is the least subscribed,
 with 733 users, indicating a preference for
 lower-cost options among Netflix
 subscribers.

REVENUE BY SUBSCRIPTION TYPE

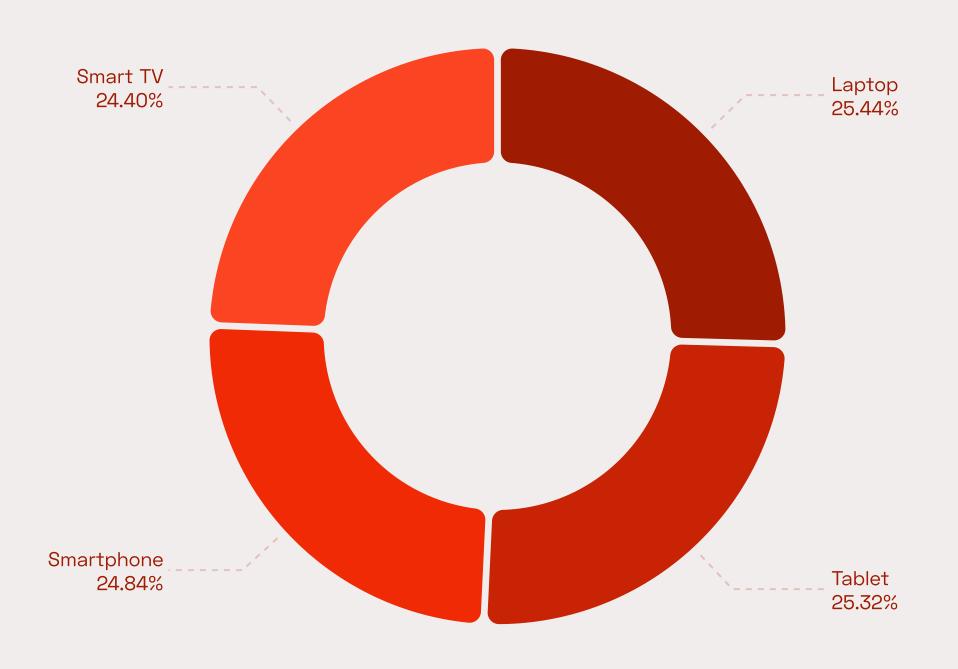

As per the survey data collected 2021-2023

- Revenue peaks in July and October,
 reaching around 5K.
- The Standard plan consistently
 generates the most revenue across
 all months.
- Revenue dips
 in January and December, with
 around 2K.

REVENUE BY SUBSCRIPTION TYPE

As per the survey data collected 2021-2023

- Revenue peaks in July and October,
 reaching around 5K.
- The Standard plan consistently
 generates the most revenue across
 all months.
- Revenue dips
 in January and December, with
 around 2K.

SQL QUERIES

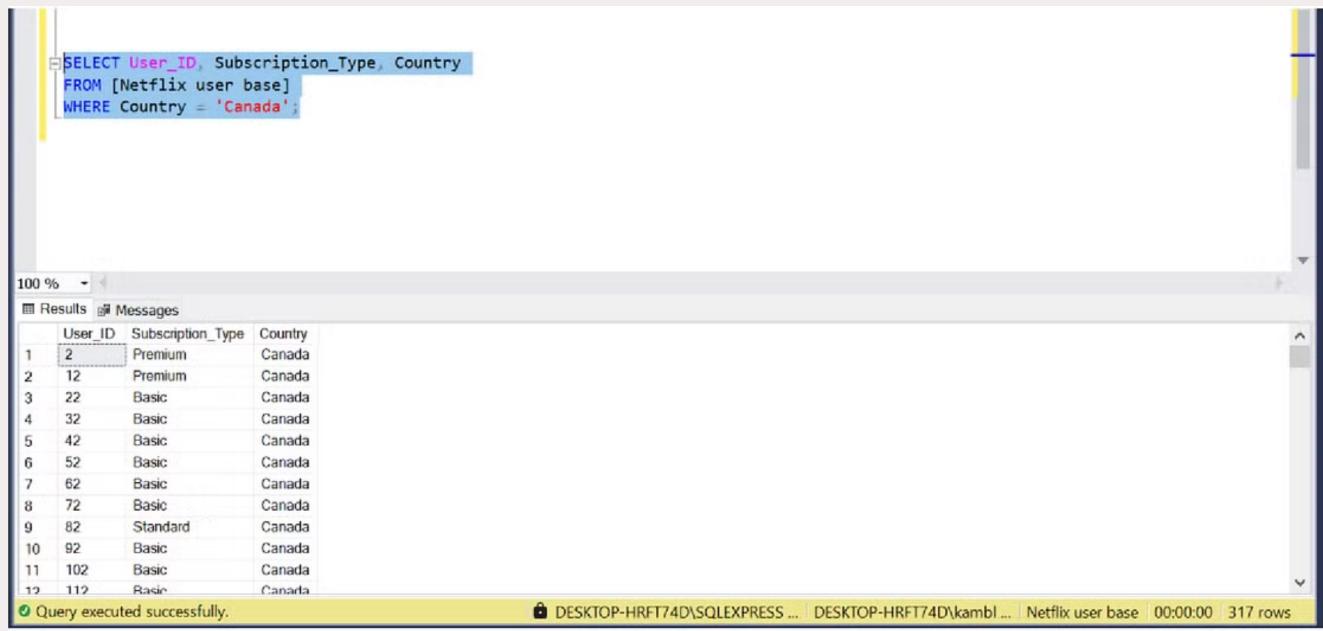

USING SMMS TOOL

BEGINNER-LEVEL SQL QUERY

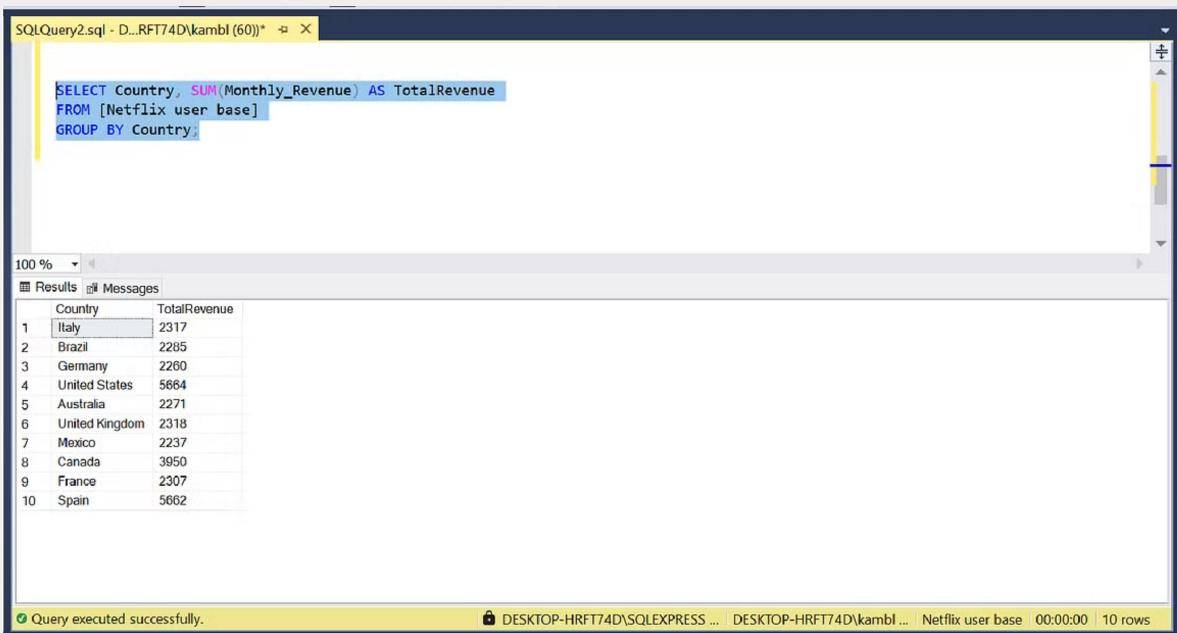

Description:

The query retrieves the User ID, Subscription Type, and Country for all Netflix users located in Canada.

INTERMEDIATE-LEVEL SQL QUERY

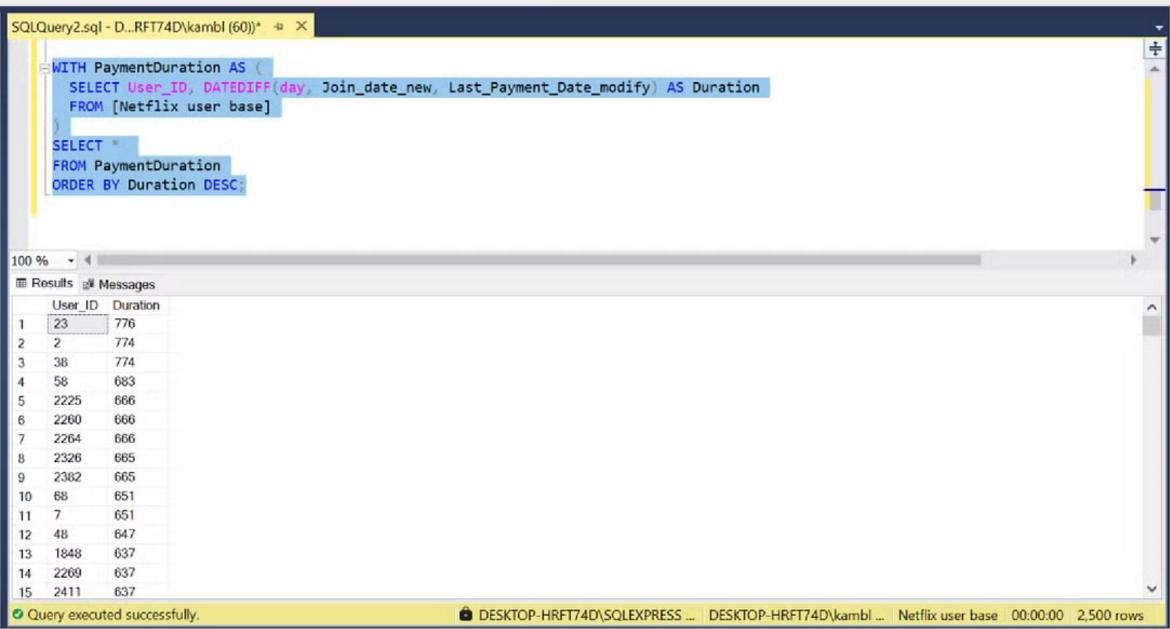

Description:

The query calculates the total monthly revenue for each country by summing up the Monthly_Revenue and grouping the results by Country.

ADVANCED-LEVEL SQL QUERY

Description:

The query calculates the duration (in days) between the user's Join Date and their Last Payment Date, then sorts the users in descending order based on this duration.

RECOMMENDATIONS TO NETFLIX

Recommendation 1

Encourage Upgrades to Premium Plans

Recommendation 2

Optimze Device Experience

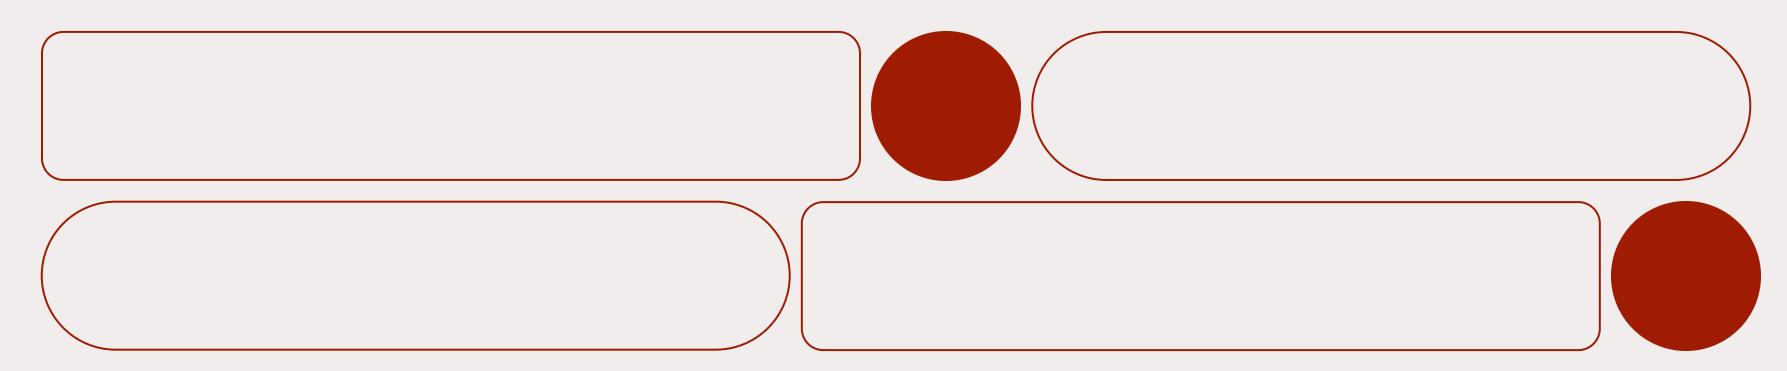

Recommedation 3

Leverage Seasonal Trends
